SUMMARY

Flutter Software Engineer experienced in building **production-grade applications** using Flutter, **BLoC**, **Clean Architecture** and **Offline-First systems**. Experienced in **secure application development**, **performance optimization**, native platform integration, **background synchronization**, and enterprise systems. Proficient in **Django**, **FastAPI** and **microservices**.

TECHNICAL SKILLS

- **Architecture:** Clean Architecture, Offline-First Architecture, Microservices Architecture, Scalable System Design
- **Software Engineering:** SOLID, DRY, KISS, Design Patterns, Code Generation
- **State Management:** BLoC, Cubit, Dependency Injection
- **Mobile Security:** Authentication, Biometric Authentication, Android Keystore, iOS Keychain, RSA-AES Encryption
- **Networking:** REST APIs, WebSockets, Push Notifications, Deep Linking, Method Channels, Event Channels
- **Data & Background Processing:** Drift DB, Local Persistence, Background Sync, WorkManager, Request Queuing, Retry Logic
- **Quality Engineering:** Unit Testing, Widget Testing, Integration Testing, Performance Optimization
- **Backend & DevOps:** Django, FastAPI, Microservices, Docker

PROFESSIONAL EXPERIENCE

Flutter Developer – Thomas Cook India

February 16 2026 - Presesnt

- Engineered **production-grade Flutter applications** using **Clean Architecture** and **BLoC**, applying **SOLID**, **DRY**, and **KISS** principles for scalable and maintainable codebases.
- Designed **Offline-First architecture** with local persistence and synchronization, leveraging **WorkManager** for reliable background processing and offline-to-online data interaction.
- Optimized **application startup performance and UI responsiveness** by reducing unnecessary initialization work and developing a **custom responsive sizing solution** for consistent cross-device behavior.
- Implemented **hybrid RSA-AES bidirectional encryption**, securely managing cryptographic private keys through **Android Keystore** and **iOS Keychain**.
- Integrated Flutter with **native Android/iOS layers** using **Method Channels** and **Event Channels**, including native polling and event-driven communication.
- Implemented **cross-app deep linking** between production applications and integrated **Firebase Analytics & Crashlytics** for application observability, diagnostics, and production monitoring.

Flutter Developer Intern - Reliance Jio Platform Limited

September 17 2025 - February 15 2026

- Developed **Flutter Web applications** and built **reusable Flutter packages/components** for internal projects, focusing on modularity and cross-platform development.
- Implemented **debounced reactive search** using **StreamTransformers** and worked with **BLoC/Cubit** for reactive state management.

Python Django Intern - Wesalvator

April 25 2025 - Aug 7 2025

- Developed **Django/FastAPI microservices**, gaining hands-on experience with scalable backend and API architecture.
- Worked with **rate limiting**, **load balancing**, and **Docker-based containerization/deployment** for production services.

PROJECTS

MedTech 360 — Centralized Healthcare Platform

Flutter | Django | DRF | Firebase | Blockchain | ML

- Built a healthcare platform integrating **patient-doctor workflows**, **appointments**, **SOS alerts** and **authentication**.
- Implemented **AI-assisted pneumonia detection** using a trained ML model and **blockchain-based diagnostic report verification**.

Freelance Project — Tribe Travels Client Website

React | HTML | CSS | Bootstrap

- Developed a **responsive travel website** for a tourism business with structured service and destination pages.
- Implemented **reusable frontend components** and responsive UI for consistent cross-device experience.

EDUCATION

B.E. CSE (AI & ML) — 2022–2026
CGPA: 9.0

ADDITIONAL INFORMATION

- Languages: English, Hindi, Marathi
- Interests: Cricket, Swimming
