SUMMARY

Flutter Software Engineer with hands-on experience building and maintaining production-grade enterprise applications using Flutter, Dart, BLoC, Clean Architecture, and Offline-First architecture. Experienced in secure mobile development, local data persistence, background synchronization, native Android/iOS integration, cross-app deep linking, Firebase Analytics & Crashlytics, and responsive UI development. Strong understanding of SOLID principles, scalable application architecture, performance optimization, and enterprise mobile systems.

TECHNICAL SKILLS

- Languages:** Dart, Python, JavaScript, HTML, CSS
- Mobile Development:** Flutter, Flutter Web, Android, iOS, Responsive UI
- State Management:** BLoC, Cubit
- Tools:** Git, GitHub, Android Studio, VS Code
- Architecture:** Clean Architecture, Offline-First Architecture, SOLID, DRY, KISS, Design Patterns
- Networking & Integration:** REST APIs, WebSockets, JSON, Deep Linking, App-to-App Integration, Method Channels, Event Channels, Push Notifications
- Monitoring & Testing:** Firebase Analytics, Firebase Crashlytics, Unit Testing
- Data & Background Processing:** Drift, Local Persistence, WorkManager, Background Synchronization, Request Queuing, Retry Logic
- Security:** RSA-AES Encryption, Android Keystore, iOS Keychain, Authentication, Biometric Authentication
- Backend & DevOps:** Django, FastAPI, Microservices, Docker

PROFESSIONAL EXPERIENCE

Flutter Developer – Risosu Consultancy (Client : Thomas Cook India) February 16 2026 - Present

- Built and maintained 3 production-grade Flutter applications using BLoC, Clean Architecture, SOLID, and DRY, improving scalability and maintainability across enterprise systems.
- Implemented Offline-First architecture using Drift and WorkManager, enabling reliable offline expense storage and background synchronization while reducing unnecessary network operations by ~25%.
- Optimized application startup and UI responsiveness, achieving ~20% faster startup performance through optimized initialization and a custom responsive sizing solution.
- Implemented RSA-AES encryption with Android Keystore and iOS Keychain, and integrated native Android/iOS functionality using Method Channels and Event Channels for secure platform-level communication.
- Implemented App-to-App integration, Deep Linking, Firebase Analytics, and Crashlytics, improving cross-app navigation and production monitoring across enterprise applications.

Key Projects

- TC Pay — Forex & Travel Card Application**
Flutter | BLoC | RSA-AES | Firebase | Deep Linking | NFC
- Developed Edge Points and Offers & Rewards modules for the production forex and travel card application.
 - Implemented secure encryption, cross-app Deep Linking, responsive UI, and contributed to the NFC module.
- TourPe — Enterprise Tour Management Application**
Flutter | BLoC | Drift | WorkManager | Android Flavors
- Developed Trip Wallet 2.0, On Tour Sell, and TMPF modules for enterprise tour expense management.
 - Implemented Offline-First expense management with Drift and WorkManager, enabling offline expense storage and automatic synchronization after connectivity is restored.
- Used Clean Architecture, BLoC, SOLID, and Android Flavors to support scalable multi-environment applications.

Flutter Developer Intern - Reliance Jio Platform Limited September 17 2025 - February 15 2026

- Developed Flutter Web applications and reusable components/packages, focusing on modular and cross-platform development.
- Implemented debounced reactive search using StreamTransformers and worked with BLoC/Cubit for reactive state management.

Python Django Intern - Wesalvator April 25 2025 - Aug 7 2025

- Developed Django/FastAPI microservices and REST-based backend services for scalable application architecture.
- Worked with rate limiting, load balancing, and Docker for reliable service deployment and backend scalability.

EDUCATION

B.E. CSE (AI & ML) — 2022–2026
CGPA: 9.0

ADDITIONAL INFORMATION

- Languages: English, Hindi, Marathi
- Interests: Cricket, Swimming
